Hazardous Weather

Hazardous Weather

The winter storm continues through Wednesday night across the Panhandles. Expect freezing rain to continue across the eastern Panhandles, with a mix of freezing rain, sleet, and snow across the central Panhandles, and mainly snow across the western Panhandles through the mid-afternoon hours Wednesday. Final round of wintry precipitation arrives late this afternoon, with mostly snow expected across the southwestern Panhandles and cold rain across the northeastern Panhandles. Significant snow accumulations will be possible - expect 2 to 6 inches with locally higher amounts Wednesday evening across the southwestern Panhandles.

A Winter Weather Advisory is in effect until 1 p.m. for all of the South Plains area. Expect light snow with accumulation up to an inch possible across the northwestern part of the area. Otherwise, freezing drizzle will be the main threat across the South Plains region.

Freeze Warning
